When must you think patent?

PhD Masterclass: Open Science & Open Publishing

Alexandre DELMOTTE

Grenoble law school – UGA

To begin

- Three observations
 - Valorisation is a form of disseminatio
 - Publication and valorisation are largely compatible
 - It' a question of timing

- One limit : it's not the same everywhere

Plan

I – Patenting vs Sharing results

II – Developing software vssharing results

Patenting Vs sharing results

- A question of novelty
- A question of contract

A question of novelty

The most important condition

Secrecy must be kept until it is protected

A question of contract

The case of commissioned research contract

The case of partnership research contract

Think about how the results will be used and published

Everything is negotiable

Developping software Vs sharing results

- Who owns the software?
- The issue of open source licences

```
b(b){return this.each(function()
ent=a(b));c.VERSION="3.3.7",c.TRAIN
d||(d=b.attr("href"),d=d&&d.replace
edTarget:b[θ]}),g=a.Event("show.bs.ta
(vate(b.closest("li"),c),this.activate
rget:e[8]})})}}},c.prototype.activate-
nd().find('[data-toggle="tab"]').attr('
b.addClass("in")):b.removeClass("fade"
aria-expanded", !0), e&&e()}var g=d.find(
ength&&h?g.one("bsTransitionEnd",f).emul
Constructor=c,a.fn.tab.noConflict=functio
.data-api", '[data-toggle="tab"]',e).on("
.each(function(){var d=a(this),e=d.data(
d){this.options=a.extend({}},c.DEFAULTS,
on("click.bs.affix.data-api",a.proxy(th
ckPosition()};c.VERSION="3.3.7",c.RESET
Starget.scrollTop(),fathis.$element.off
ec?!(e+this.unpin<=f.top)&&"bottom":!(e
"bottom"},c.prototype.getPinnedOffset
s.$target.scrollTop(),b=this.$elemen
(a.proxy(this.checkPosition.this) a
```

Who owns the software

- Copyright law
- Employer is the owner

Software development: the issue of open source licences

The use of open source code during research

Contaminating effect
